Remote management

The machine, which is internet connected through a wi-fi antenna, sends the data via cloud to the server. A special software processes the data making them available on the operator's PC.

The customer can check in real time the operating status of the machine and the alarms such as "machine out of order", "door open", "no compressed air" and "end of the product".

By the same way, through PC, the operator can also control and modify time and price of selections, activate a specific function, reset or switch off the machine.

Model:

Code	Model	Volt	Power	Tank	Weight
CW15S3434FR	4 Fragrance	230	500 Watt	4x5 L	33 Kg
